As you go through this, think about whether using the "Average Risk" in each facility run is useful and can be used to differentiate between the "Maximum Risk" number. Thanks

**Subject:** OAQPS Risk Assessment for Region 6

Hi Jeff and Ruben,

Please see the attached risk assessment that we performed for the requested eight Texas and Louisiana facilities. There are three documents attached: a memo that summarizes the risk assessment, the full detailed risk report and a spreadsheet of data input changes referenced in the report.

I will be on leave tomorrow through June 20<sup>th</sup>. If you have any questions about the assessment, I will gladly follow-up upon my return. I will also set up HEM trainings with Ashley as soon as I'm back in the office.

If you have any questions in the meantime, please reach out to Kelly.

Thanks,

-Mike
